Re: Missouri-American Water Company
Case Nos. WR-2026-0304 and SR-2026-0305

Dear Judge Dippell,

On behalf of Missouri-American Water Company (“MAWC” or “Company”), I am providing herewith to the Missouri Public Service Commission (“Commission”) for filing certain tariff sheets in electronic form consisting of revised water and sewer tariff sheets. The proposed tariff sheets are listed on Appendix A, bear a date of issue of July 1, 2026, and an effective date of July 31, 2026.

The purpose of this filing is to implement a general rate increase for water and sewer service provided by MAWC. The revised rates are designed to produce \$191.9 million in additional annual water and sewer revenues (excluding gross receipts and sales taxes) or a 31.2% increase over revenues authorized in MAWC’s last general rate case (WR-2024-0320) and subsequent WSIRA cases (WR-2025-0345 and WR-2026-0160).

The water rates have been designed to implement the Company’s proposal to move to consolidated tariff pricing. Provided herewith as Appendix B is a description of the impact MAWC’s proposal would have on residential customers in each district utilizing 3,000, 4,000, and, 5,000 gallons monthly usage levels.

Provided in electronic form are the direct testimony and schedules of the following MAWC witnesses:

Richard Svindland
Jody Carlson
Brian LaGrand
Matthew Lueders

Deba Ather
Max McClellan
Jennifer Grisham
Matthew Mason

Brittany Komenda
Courtney Pallies
Nicholas Furia
Ann Bulkley

Robert Mustich
Joseph Weiss
Amanda Nori

Also, MAWC's Minimum Filing Requirements, as required by Commission Rule 20 CSR 4240-3.030(3)(B), are contained in Schedule BWL-2, attached to the Direct Testimony of Brian LaGrand.

Please see that this filing is brought to the attention of the appropriate Commission personnel, and please let me know if you have any questions or concerns regarding this tariff filing.

Community, Town or City**PFAS Litigation Universal Surcredit "PLUS"****AVAILABILITY** – This bill credit is available to all residential ("domestic") and non-residential service classifications. *

DESCRIPTION – Missouri-American Water Company ("Company") sought compensation from various manufacturers of chemicals of Aqueous Film Forming Foam. This litigation was consolidated for the limited purpose of pursuing settlements into multi-district litigation no. 2873 ("MDL"), which are overseen by the United States District Court for the District of South Carolina. The Company has entered into multiple settlements in the MDL and may enter into further agreements. These settlements may provide one or more payments. The proceeds will be net of any costs to be paid out of the settlement funds incurred to administer or achieve the settlement. The purpose of this tariff is to provide a bill credit to the Company's customers that credits the total amount of the proceeds the Company receives from these MDL settlements. *

The proceeds from the MDL shall be credited to customers as a one-time bill credit within a reasonable time after the Company receives payment of the funds. The Company shall provide notice to the Commission Staff and the Office of the Public Counsel of the amount of proceeds included and a workpaper showing the determination of the credit as outlined below. The Company may combine proceeds resulting from the MDL settlement. *

SURCREDIT CALCULATION – The PLUS credit shall be calculated as follows: *

$$\text{PLUS} = \frac{\text{MDLP}}{\text{CUSTOMERS}}$$

Where: **PLUS** represents the credit to each customer as a result of proceeds from MDL settlements. *

MDLP represents the proceeds received from one or more MDL settlements. *

CUSTOMERS represents the total active customer count for all residential and non-residential service classes at the time of the credit calculation. *

Revenue Stabilization Mechanism (RSM)

AVAILABILITY – All residential (“domestic”), commercial, other public authority and sale for resale metered water customers.

SECTION A - DEFINITIONS

Actual Revenue (AR) shall mean the actual dollar amount of revenues billed to customers for the identified Service Classifications, excluding revenues arising from adjustments under this tariff and any other tariff, which were billed for the applicable Fiscal Year, excluding revenues from acquisitions approved by the Commission that have not yet been approved in a general rate case and any revenues collected under Rate I (Sheet RT 10) or Rate W (Sheets RT 11.1 and RT 11.2).

Actual Production Costs (APC) shall mean the actual dollar amount of power, chemicals, purchased water and waste disposal incurred by the Company in the Fiscal Year, excluding production costs from acquisitions approved by the Commission that have not yet been approved in a general rate case.

Effective Period shall mean the period for which the adjustments in Section B are to be billed to customers, and shall be the nine-month period April through December after the Filing Month.

Effective Period Usage (G) shall mean the number of 100 gallon units delivered to customers by the Company, including the number of 100 gallon units for the applicable Effective Period.

Filing Month shall mean the month in which an adjustment is determined by the Company and submitted to the Commission, on or before January 31.

Fiscal Year shall mean the Fiscal Year of the Company that ended as of the most recent December 31.

Interest (i) shall mean the Company short-term interest borrowing rate.

Previous Amortization Period shall mean the nine-month reconciliation amortization period that ended as of the most recent Fiscal Year.

Rate Case Revenue (RCR) shall mean the dollar amount of revenues reflected in the revenue requirements approved by the Commission for the applicable Service Classifications in the Company’s most recent general rate case. In a month or year in which new rates come into effect, the RCR shall be prorated based upon the number of days in the month or year under the old rates and the number of days in the month or year under the new rates.

Revenue Stabilization Mechanism (RSM)

Rate Case Production Costs (RPC) shall mean the dollar amount of power, chemicals, purchased water and waste disposal expenses reflected in revenue requirements approved by the Commission in the Company's most recent general rate case. In a month or year in which new rates come into effect, the RPC shall be prorated based upon the number of days in the month or year under the old rates and the number of days in the month or year under the new rates.

Upcoming Amortization Period shall mean the nine-month reconciliation amortization period commencing on April 1 following the Fiscal Year.

SECTION B – DETERMINATION OF ADJUSTMENT

$$\frac{((RCR - RPC) - (AR - APC))(1 + i) + RA}{G}$$

Where:

- RCR** represents the Rate Case Revenue for the Fiscal Year.
- RPC** represents the Rate Case Production Costs for the Fiscal Year.
- AR** represents the Actual Revenue for the Fiscal Year.
- APC** represents the Actual Production Costs for the Fiscal Year.
- i** represents the interest rate
- G** represents the Factor G for the Effective Period.
- RA** represents the dollar amount due the Company (+RA) or the customers (-RA) arising from adjustments under this tariff that were under-billed or over-billed in the prior Fiscal Year.

The adjustment components above shall be summed together for billing purposes. If either component of the adjustments computes to \$0.0001 per 100 gallons or more, any fraction of \$0.0001 in the computed per 100 Gallons adjustment amount shall be dropped if less than \$0.00005 or, if \$0.00005 or more, shall be rounded up to the next full \$0.0001.

SECTION C – REPORTS AND RECONCILIATIONS

The Company shall file with the Commission on or before January 30 of each year, the RSM calculation and support for any annual adjustments to be effective under this tariff. The Commission Staff will have 60 days to review. The reconciliation amount will be surcharged from April 1 through December 31 of each calendar year. Any credit will be issued as soon as administratively possible.

- A. Unprotected cross-connections with the public water supply are prohibited. No physical connection between the potable water supply system of the public utility and that of any other water supply or source of actual or potential contamination will be permitted except in compliance with the regulations of the Missouri Department of Natural Resources and Company requirements. +
+
+
- B. Cross connection control is designed for containment protection of the Company's distribution system from cross connections located on Customers' premises. The rules are not designed to protect any one Customer from risks associated with cross connections located within the Customer's premises. A Customer may be required to install, at the Customer's expense, an approved backflow prevention assembly of the proper type as close as possible to the meter, on the Customer's side, as practicable and before any branching occurs, with the exception of underground sprinkler systems and boilers where the assembly may be installed on the branch of the service line that specifically serves these systems. The installation of the backflow assembly will be required as a condition for continued service for existing Customers, and before service to a new Customer will be permitted. The installation of all backflow prevention assemblies required by these rules or other applicable cross connection control program must be performed by a Qualified Backflow Assembly Installer.
- C. These rules and other cross connection control programs apply to all commercial, industrial, and public authority facilities. Establishments that have only drinking fountains, and restrooms, having non-commercial type water using appliances may not be required to install a backflow prevention assembly at the discretion of the Company.
- D. The Company will require backflow protection on any class of Customers including residential when any of the following conditions exist:
1. The premises qualifies as a Class I or Class II backflow hazard in accordance with the Missouri Department of Natural Resources Backflow Prevention Rules;
 2. The premises has an auxiliary supply;
 3. The premises has an underground sprinkler system;
 4. The premises has a private fire protection system;
 5. The premises has a reported history of cross connections being established or re-established;
 6. The premises has a permanently installed means of internally pressurizing the water supply (e.g. pressure booster, power shower, etc.);
